

PLM INTELLISTEER

Relieve the manual steering burden

IntelliSteer® is available as a **fully integrated New Holland designed and developed Automatic Steering System** for New Holland tractors and combines. Available **from the factory or as a retrofit** package for any IntelliSteer-ready equipment, it **maximises productivity and efficiency to optimise your yields** and to **increase your profits**.

- Ensures parallel pass-to-pass swaths to eliminate skips and overlaps
- Delivers accuracy as precise as 1.5 cm with PLM RTK+
- Maintains accuracy also in rolling terrain thanks to T3 terrain compensation

It works via a single integrated display through the **IntelliView™ IV** or **IntelliView™ 12** terminals, providing full management of machine and autoguidance functions.

INTELLIVIEW IV DISPLAY & NH 392 RECEIVER

INTELLIVIEW 12 DISPLAY & PLM CYGNUS RECEIVER

MYPLMCONNECT

Connect your PLM Intelligence or telemetry modem-equipped machine now to manage your fleet, farm and data through the **MyPLM® Connect** portal on your desktop or mobile device.

PLM RTK+

PLM RTK+ is a subscription based RTK correction service, which delivers high quality modelled GNSS corrections to all users working inside the network boundary. It provides the highest accuracy possible up to 1.5 cm in less than 10 seconds. New Holland offers a high density network with no base station investment and is multi-brand compatible.

PLM RTK+ will bring you many benefits:

- Reduce overlapping in tillage & soil preparation
- Save inputs in seeding
- Reduce fertiliser & pesticide inputs
- Increase productivity in harvesting
- Minimise soil compaction by using Controlled Traffic Farming
- Use high accuracy section control to automate your applications
- Improve water management by Field Levelling
- Continue operations under poor visibility conditions

PLM SUPPORT

ASSISTANCE

Minimise your downtime

Whatever the problem or question, the dedicated team at our PLM support center are on hand to provide expert advice and technical support.

- Monday to Friday, from 7am - 7pm

- Affordable plug-and-play system

RAVEN'S ADVANCED COMBO

- Advanced steering
- Simple, customisable user interface with touchscreen controls.
- ISO Universal Terminal (UT) and Task Controller
- Recommended for up to 5-product variable rate control
- Steering controller, GNSS receiver & cellular connectivity modem in one device
- GPS, GLONASS and BeiDou, Galileo
- PLM RTK+ compatible

CR12 DISPLAY WITH RS1 RECEIVER

12-inch display

The new **XCN-1060** display

Our well-known 10-inch XCN-1050 display for retrofitting almost all brands has received an upgrade and has been replaced by its successor, the XCN-1060.

WHAT'S NEW IN A NUTSHELL?

- Faster processor
- Greater memory
- More storage capacity

The new XCN-1060 display is compatible with the NAV-900 guidance controller or NAV-500 antenna and our proven retrofit steering types.
